

Your Home, Farm and Health! Your Values! Your Independence!

AT RISK

AGRICULTURE: Sampson County is the **NUMBER ONE** agricultural county in the nation. Why is Sampson County jeopardizing our economic base for a litter incinerator? Just how much air pollution can our livestock and produce handle?

MONEY: Sampson County has its share of economic problems. Why are we giving **MILLIONS** in tax credits to Fibrowatt when all we get in return are **HIGHER** electric bills and **DECREASED** land value?

TOXINS: Incinerators emit **DIOXINS** and other toxins. EPA lists **DIOXINS** as the most toxic chemicals known to science. * Lead, arsenic, and other toxins will be released into the air and fall on our land and there is **NOTHING** we can do about it.

SCHOOLS: USA Today already ranks Sampson County schools among the **worst** in the nation for air toxins.** We should be cleaning up our children's air, not bringing in more pollution.

COMMUNITY INJUSTICE: Wind blows in all directions and we will have **no control** over what we breathe once Fibrowatt lights up. Sampson County is placing this industry next to the **Martin Luther King** community. It is time Sampson County stood up for **ALL** of its residents.

ACT NOW!

Faith, Family and Farming! Preserve Our Past, Protect Our Future!

Attend Community Meeting **March 21st, 12:00 pm** at Mt. Pleasant Baptist Church
4442 Bonnettville Road, Clinton, NC
